PROFILE

Hello! I'm Ganesh Dole, a dedicated full-stack web developer specializing in Frontend and Backend technologies. With expertise in React, HTML, CSS, JavaScript, Node.js, and databases, I bring a comprehensive skill set to every project. My passion lies in crafting user-friendly and visually captivating interfaces, while also ensuring robust and efficient back-end solutions.

B.E Computer Engineering   12/2021 – present
Modern Education Society's Wadia College of Engineering, Pune   Pune, India

HSC   2020 – 06/2021
B H Chate Residential Jr. College of Science   Pune, India

SSC   2018 – 06/2019
Reliance Foundation School, Lodhivali   Lodhivali, India

CERTIFICATES

Programming with JavaScript 🔗

Mastered JavaScript fundamentals through Coursera's "Programming with JavaScript" course. Learned to create interactive web experiences & explored object-oriented & functional programming concepts.

The Frontend Developer Career Path 🔗

I've finished Scrimba's Frontend Developer Career Path! This program has been instrumental in equipping me with the skills I need to build modern web applications using HTML, CSS, JavaScript, and React. I'm particularly excited about my newfound knowledge of UI design principles.

Advanced React 🔗
Leveled up my React skills in Coursera's "Advanced React" course. Built robust components, mastered API integration, and aced testing with React Testing Library. Ready to tackle complex React projects!

SKILLS AND TECHNOLOGIES

Programming Languages: C, Java, Javascript, python, • **Database Systems:** MySQL, MongoDB •
Operating Systems: Windows, Ubuntu(Basic), MacOS • **Web Technologies** React JS, HTML5, CSS3, Bootstrap 4, Postman, Axios, NodeJs, Tailwind CSS, Redux

PROJECTS

Pizza Shop 🔗   05/2023 – present
A Full-stack web application for a pizza restaurant.
The Pizza Shop V2 project is a full-stack web application for a pizza restaurant, featuring a React frontend and a Node.js/Express backend. Key features include a home page, about page, contact form, user registration and login, and error handling. User authentication using JWT.

The frontend uses Tailwind CSS, ReactJS, and Redux, while the backend utilizes MySQL with Express integration.

#VANLIFE   present
#VANLIFE is a campervan rental website developed using React.
VANLIFE is a React-based website for hassle-free campervan rentals. It uses React Router 6 and shadcn/ui for seamless navigation and stylish UI elements. Tailwind CSS enhances the user interface, while TypeScript, Material-UI, and Supabase ensure robust functionality. No installation is required to explore the campervan options.

Quizzical 🔗

Quizzical is a quiz web application.

Quizzical is a quiz web application that accesses trivia questions from the Open Trivia Database API and scores players based on their answers. It offers multiple game options such as difficulty and category for players to customize their experience.
